

Dear Persons,

I am concerned about the expansion of LPFM, because it can/will displace current FM Translators that have important civic impact. I am an Air 1 listener in the Wichita, Ks area. This station provides an unending source of positive Christian input. In these times of terror, immorality, and general social decay, it is becoming more and more difficult to remain positive and hopeful about the future.

Air 1 provides a powerful message; along with positive, encouraging, programming that helps me, as a Christian to remain focused on Jesus, and his teachings. This in turn enables me to be more productive at work, in my home and in my community. It helps me to be more positive which in turn is beneficial to each and every life I touch through the course of my day.

If Air 1's translator were to be replaced by "some undisclosed" LPFM station. A void would be left where there was once purpose in abundance. Our community benefits from Air 1's positive message and programming. They encourage civil responsibility, and encourage us to become more active in local programs that assist the homeless, elderly, and the poor. I for one, have responded to their message, and contribute to my community in ways I hadn't before. Both monetarily and through donations of self and time.

Please protect existing translators that provide this type of service to communities. America was originally founded on Gods laws. As we continue to turn away from God in government and in other aspects of our society, we reap lives void of honesty and integrity. This hurts us all as the effects ricochet through every part of our society. These important values MUST be returned to us or the decay will continue, causing ever increasing difficulty and strife.

Stations like Air 1 provide help by reaching out to 100s of thousands of lonely, hurting people every day. We can return integrity and accountability to our society, but it won't be through costly government programs. It must be done one person at a time. We must provide people with God's message, so He may begin to touch and heal hearts and minds.

Thankyou for the opportunity to petition you and for spending the time to read my comment.

God Bless,
Todd Gearheart
